WHITE LOTUS GROUP

Chanakya Team Training

Everything a team member needs to get productive on the villa construction management platform in the first thirty minutes.

LIVE AT	chanakya-pm.onrender.com
AUDIENCE	Project managers, planners, analysts, management
ADMIN	Vandana P . vandana.p@whitelotusgroup.in
ISSUED	April 2026

SECTION 01

Sign in and navigate

Sign in with Google (preferred)

1. Open `chanakya-pm.onrender.com`
2. Click **Sign in with Google**, choose your `@whitelotusgroup.in` account

First time sign in auto creates your account with EDIT access. Need more, ask Vandana.

Email and password

Enter your work email and the shared default password from Vandana. Forgot yours, email Vandana. Self reset is not yet built.

Session

- Signed in for seven days
- Warning banner fifteen minutes before expiry so you can save and sign in again

Navigating

You land on **Select Development**. Choose Amanvana, Kandhavara, or View All. Click a villa card to open its dashboard. The badge next to the Chanakya logo shows the current development, click it to go back.

Villa dashboard tabs

TAB	WHAT IT SHOWS
WBS	Full task table, phases, subphases, every task
Gantt	Visual timeline, dependencies, critical path
Report	Daily, weekly, monthly progress reports
Planner	Week by week planner
Baselines	Schedule snapshots for comparison
Critical Path	Tasks that drive the project end date
Calendar	Tasks on a calendar grid
Resources	Team and material allocation
Costs	Budget versus actual
Approvals	Items waiting for sign off

SECTION 02

Daily tasks

Add a task EDIT

1. Villa, **WBS** tab, **Add Task** (top right)
2. Fill name, phase, dates, status, progress. Optional. predecessors, assignee, cost.
3. Save. Auto syncs within 1.5 seconds.

Edit a task

Click the task row, the panel opens on the right. Edit fields, changes save automatically. On the Gantt, drag a bar left or right to shift dates. Duration is preserved, and an undo button appears.

Status, blocked, delete

- Change **Status** from the dropdown
- For **blocked** or **on hold**, a reason field appears. Fill it in.
- Delete shows a toast with **Undo** for six seconds. Admins can restore later via the audit log.

Baselines EDIT

Open the **Baselines** tab, click **Capture New Baseline**, name it, save. Baselines are read only snapshots. Compare any two to see schedule changes.

Import, export, audit MANAGE

- **Import**. CSV or Excel. Three modes. Column mapper with preview.
- **Export**. Downloads a full JSON backup. Every export is logged.
- **Audit log**. Last five hundred actions. Who changed what, when.

Shortcuts

ACTION	SHORTCUT
Save a modal	Enter inside a text field
Cancel a modal	Escape
Reschedule on Gantt	Drag the bar
Zoom Gantt	Week, Month, Quarter
Hard reload	Cmd+Shift+R or Ctrl+Shift+R
DevTools console	Cmd+Option+J or F12

SECTION 03

Who can do what

PERMISSION	UNLOCKS
VIEW	Read every villa, task, report. No editing buttons.
EDIT	Add, edit, delete tasks. Drag Gantt bars. Update progress.
APPROVE	See the Approvals panel. Approve or reject requests.
MANAGE	Create villas, Import, Export, Add Development, Audit Log, Manage panel.

Permissions are independent. A user can have any combination.

Current roster

NAME	ROLE	PERMISSIONS
Admin	Administrator	all
Vandana P	Project Manager	edit, approve, manage
Praveer C	Planner	edit, manage
Vaishali P	Project Manager	edit, manage
Shraddha B	Project Manager	edit, manage
Dinesh	Project Manager	edit, manage
Madhavarajan S	Project Manager	manage
Pavan	Project Manager	approve
Chetan	Project Manager	approve
Stanly John	Project Manager	view
Product Analyst	Analyst	view

Anyone else from `@whitelotusgroup.in` who signs in via Google gets **edit** automatically. Contact Vandana for elevated permissions.

Working together

- Every change auto saves every 1.5 seconds. Others see it on reload or next save.
- If two people edit the same villa at once, whoever saves second is asked to **Reload**, then redo the edit. No data is silently lost.
- If the connection drops, a banner retries every five seconds. After thirty seconds it turns red and asks you to stop editing until the network returns.
- Every create, edit, delete, reschedule, import, export, and approval is logged with your name and timestamp.

SECTION 04

Complete feature list

Full inventory of what Chanakya does today. Items marked MANAGE require elevated permission.

Multi development
- Amanvana, Kandhavara, custom developments
- Per development villa cards with risk
- View All Developments cross roll up

Task management
- Full CRUD with six second undo on delete
- Dates, status, progress, priority, assignee, cost
- Milestones, inspection flags, blocking reason
- Phase and subphase grouping, collapsible
- Predecessors. FS, SS, FF, SF with lag

Work Breakdown Structure
- Collapsible phase and subphase tree
- Sortable columns
- Persistent filters across tabs
- Field validation with feedback

Critical path
- Automatic from predecessors
- Dedicated Critical Path tab
- Total float per task
- Critical tasks highlighted on Gantt

Resources
- Team roster with role, contact, rate
- Availability and work type
- Per resource colour on Gantt

Today tasks
- Due today across every villa
- Tomorrow and upcoming preview
- Inline quick edit

Site Plan, Amanvana
- Live interactive villa master plan
- Status colour coding per villa

Villa management MANAGE
- Create, edit, delete villas
- Status. on track, at risk, delayed, on hold
- Auto computed progress from tasks
- Copy villa task structure

Gantt chart
- Zoom. Week, Month, Quarter
- Dependency arrows and critical path
- Critical only and milestones only filters
- Baseline overlay
- Drag to reschedule with undo
- Print Gantt to styled PDF

Baselines
- Capture snapshots anytime
- Multiple baselines per villa
- Side by side compare with variance
- Overlay on the Gantt

Approvals
- Request approval from any task panel
- Approvals queue for approvers
- Approve or reject with comment
- Status shown on the task

Planner
- Weekly and monthly views
- Drag and drop assignment
- Per week load visibility

Reports
- Daily, weekly, monthly
- CSV export per view
- Printable report window

Costs
- Villa budget versus actual
- Per task cost and contingency
- Currency. INR, USD, EUR, GBP

Calendar

- Tasks on a monthly grid
- Colour coded by status
- Click any day for tasks due

Audit log MANAGE

- Every action logged automatically
- User, action, entity, timestamp
- Last five hundred entries

Reliability

- Auto save with optimistic locking
- Offline banner and automatic retry
- Boot failure recovery overlay
- Four layer pre deploy smoke test

Data import MANAGE

- CSV and Excel upload
- Three modes. By Phase, By Villa, Master Schedule
- Column mapper with preview
- Optional dependency mapping

Security

- JWT session, seven days, expiry warning
- bcrypt password hashing
- Google Sign In with domain allow list
- Role based access control
- Rate limited login against brute force
- XSS input filter on user entered names

UX polish

- Brand aligned warm palette
- Undo for destructive actions
- Real time field validation
- Enter to save, Escape to cancel

SECTION 05

Troubleshoot, limits, support

If you see

SYMPTOM	DO THIS
Cannot sign in	Check the URL, try Google sign in, email Vandana
Raw code or a blank app	Hard reload. Cmd+Shift+R or Ctrl+Shift+R
Another user saved banner	Click Reload, redo your edit
Missing Manage, Import, New Villa	You lack manage permission. Ask Vandana.
Gantt is slow	Switch zoom from Week to Month or Quarter
Accidentally deleted a task	Click Undo in the toast within six seconds. Otherwise contact Vandana.

Known limits

- Desktop and laptop only. Mobile is not yet supported.
- No self service password reset. Email Vandana.
- No photo or document attachments. Use the shared drive.
- Live updates appear on reload or next save, not instantly.
- Bulk task edit is limited to Gantt drag for date shifts.

Support

All issues route to **Vandana P** at `vandana.p@whitelotusgroup.in`. For bugs, include a screenshot and the DevTools Console output so the fix can go in quickly.

DAILY CHEAT SHEET

The essentials on one page.

Sign in	chanakya-pm.onrender.com, Sign in with Google
Pick development	Amanvana, Kandhavara, View All
Switch development	Badge next to the Chanakya logo
Add a task	Villa, WBS tab, Add Task
Edit a task	Click the row, edit fields, auto saves
Reschedule	Gantt, drag the bar
Undo a delete	Click Undo in the toast within six seconds
Capture baseline	Baselines tab, Capture New Baseline
Save conflict	Click Reload, redo your edit
Anything stuck	Hard reload, then message Vandana
