Signing in

Google sign in

Preferred for everyone at White Lotus Group.

1. Open `chanakya-pm.onrender.com`
2. Click **Sign in with Google**
3. Choose your `@whitelotusgroup.in` work account

First time sign in auto creates your account with EDIT access. Need more, ask Vandana.

Email and password

1. Enter your work email
2. Enter the shared default password from Vandana
3. Click **Sign In**

Forgot your password, email Vandana. Self reset is not yet available.

Session

- You stay signed in for seven days
- A warning banner appears fifteen minutes before expiry so you can save and sign in again
- If a session expires mid edit, you are returned to the login screen with a clear notice

SECTION 02

Navigating the app

After signing in, you land on the **Select Development** screen. Choose **Amanvana**, **Kandhavara**, or **View All Developments**. Click a villa card to open its dashboard.

> **Tip.** The badge next to the Chanakya logo shows which development you are in. Click it to return to the Select Development screen.

Villa dashboard tabs

TAB	WHAT IT SHOWS
WBS	Full task table, phases, subphases, every task
Gantt	Visual timeline with bars, dependencies, critical path
Report	Daily, weekly, monthly progress reports
Planner	Week by week task planner
Baselines	Snapshots of schedule versions for comparison
Critical Path	Tasks that determine the project end date
Calendar	Tasks plotted on a calendar grid
Resources	Team and material allocation
Costs	Budget versus actual
Approvals	Items waiting for sign off

The left sidebar lists every villa in the current development. Click any name to switch.

Daily tasks

Add a task EDIT

1. Villa dashboard, **WBS** tab
2. Click **Add Task**, top right
3. Fill in name, phase, dates, status, progress
4. Optional, add predecessors, assignee, cost, notes
5. Click **Save**. Auto saves within 1.5 seconds.

Edit a task

1. Click the task row. The task panel opens on the right.
2. Edit fields, changes save automatically
3. Or click the task name to open the full modal

On the Gantt, drag a bar left or right to shift dates. Duration is preserved. An undo button appears.

Status, blocked, delete

- Change **Status** from the dropdown
- For **blocked** or **on hold**, a reason field appears. Fill it in so teammates know why.
- Delete shows a toast with **Undo** for six seconds. Admins can restore later via the audit log.

Baselines EDIT

1. Open the **Baselines** tab
2. Click **Capture New Baseline**
3. Name it, add notes, save

Baselines are read only snapshots. Compare any two to see schedule changes.

Import, export, audit log MANAGE

- **Import**. CSV or Excel, three modes, column mapper with preview.
- **Export**. Downloads a full JSON backup. Every export is logged.
- **Audit log**. Last five hundred actions, who changed what and when.

SECTION 04

Who can do what

PERMISSION	UNLOCKS
VIEW	Read every villa, task, report. No editing buttons.
EDIT	Add, edit, delete tasks. Drag Gantt bars. Update progress.
APPROVE	See the Approvals panel. Approve or reject requests.
MANAGE	Create villas, Import, Export, Add Development, Audit Log, Manage panel.

Permissions are independent. A user can have any combination.

Current roster

NAME	ROLE	PERMISSIONS
Admin	Administrator	all
Vandana P	Project Manager	edit, approve, manage
Praveer C	Planner	edit, manage
Vaishali P	Project Manager	edit, manage
Shraddha B	Project Manager	edit, manage
Dinesh	Project Manager	edit, manage
Madhavarajan S	Project Manager	manage
Pavan	Project Manager	approve
Chetan	Project Manager	approve
Stanly John	Project Manager	view
Product Analyst	Analyst	view

Anyone else from `@whitelotusgroup.in` who signs in via Google gets **edit** automatically. Contact Vandana for elevated permissions.

Working together

Auto save and conflicts

- Every change auto saves to the server every 1.5 seconds
- Other team members see your changes on reload or next save
- If two people edit the same villa at once, whoever saves second sees the banner Another user saved changes after you last synced. Reload to see the latest, then retry your edit.
- Click **Reload**, redo your edit. No data is silently lost.

Offline and bad network

- If the connection drops, a banner reads Your changes are not syncing to the server. Retrying.
- The app retries automatically every five seconds
- If saves keep failing for thirty seconds or more, the banner turns red and asks you to stop editing until the connection returns
- Click **Retry now** to force a retry, or **Reload** to start fresh

What is logged

Every create, edit, delete, reschedule, import, export, and approval is logged with your name and a timestamp. Admins can review the log at any time.

Keyboard and mouse

ACTION	SHORTCUT
Save task modal	Enter, inside a text field
Cancel modal	Escape
Quick edit, WBS	Click a task cell
Reschedule on Gantt	Drag the bar
Zoom Gantt	Week, Month, Quarter
Hard reload	Cmd+Shift+R or Ctrl+Shift+R
DevTools console	Cmd+Option+J or F12

Complete feature list

A full inventory of what Chanakya can do today. Items flagged MANAGE require elevated permission.

Multi development structure

- Amanvana, Kandhavara, and any development you add
- Per development villa cards with progress and risk
- View All Developments cross roll up
- Add new developments MANAGE

Villa management

- Create, edit, delete villas MANAGE
- Status. on track, at risk, delayed, on hold
- Auto computed progress from tasks
- Contractor, PM, SS, budget, area, notes
- Copy villa task structure

Task management

- Full CRUD with six second undo on delete
- Dates, status, progress, priority, assignee, cost
- Milestones, inspection flags, blocking reason
- Phase and subphase grouping, collapsible
- Multi select and bulk actions
- Predecessors. FS, SS, FF, SF with lag

Gantt chart

- Zoom. Week, Month, Quarter
- Dependency arrows
- Critical path highlighting
- Critical only and milestones only filters
- Baseline overlay
- Drag to reschedule with undo
- Print Gantt to styled PDF

Work Breakdown Structure

- Collapsible phase and subphase tree
- Sortable columns
- Persistent filters across tab switches
- Field validation with visual feedback
- Status tooltips explaining how each was derived

Baselines

- Capture snapshots at any time
- Multiple baselines per villa
- Side by side compare with variance
- Overlay on the Gantt

Critical path analysis

- Automatic computation from predecessors
- Dedicated Critical Path tab
- Total float shown per task
- Critical tasks highlighted on Gantt

Resources

- Team roster with role, contact, rate
- Availability and work type
- Per resource colour on Gantt

Today tasks panel

- Tasks due today across every villa
- Tomorrow and upcoming preview
- Inline quick edit
- Progress and save indicator

Site Plan, Amanvana

- Live interactive villa master plan
- Status colour coding per villa
- Reads live data from the app

Calendar

- Tasks on a monthly calendar grid
- Colour coded by status
- Click any day to see the tasks due

Approvals

- Request approval from any task panel
- Approvals queue for approvers
- Approve or reject with a comment
- Status shown on the task

Planner

- Weekly and monthly views
- Drag and drop task assignment
- Per week load visibility
- State persists across sessions

Reports

- Daily, weekly, monthly
- CSV export per view
- Full JSON backup and restore
- Printable report window

Costs

- Villa level budget versus actual
- Per task cost
- Contingency percentage
- Currency. INR, USD, EUR, GBP

Data import MANAGE

- CSV and Excel upload
- Three modes. By Phase, By Villa, WL Master Schedule
- Column mapper with preview
- Optional dependency mapping
- Safe restore pane

Audit log MANAGE

- Every action logged automatically
- User, action, entity, timestamp
- Last five hundred entries displayed

Security

- JWT session, seven days, fifteen minute expiry warning
- bcrypt password hashing
- Google Sign In with domain allow list
- Role based access. view, edit, approve, manage
- Rate limited login to blunt brute force
- XSS input filter on all user entered names
- HTTPS only

Reliability

- Auto save every 1.5 seconds
- Optimistic locking, no silent data loss
- Offline banner with automatic retry
- Critical warning if offline for thirty seconds
- Boot failure canary with clean reload
- Four layer pre deploy smoke test

UX polish

- Warm brown and gold, White Lotus aligned
- Undo for destructive actions
- Real time field validation
- Persistent WBS filters
- Enter to save, Escape to cancel
- Smooth screen transitions

Troubleshooting and limits

Common issues

IF YOU SEE	DO THIS
Cannot sign in	Verify the URL, try Google sign in, email Vandana
Raw code on screen or blank app	Hard reload. Cmd+Shift+R or Ctrl+Shift+R
Another user saved banner	Click Reload, redo your edit
Missing Manage, Import, or New Villa	You do not have manage permission. Ask Vandana.
Gantt is slow	Switch zoom from Week to Month or Quarter
Accidentally deleted a task	Click Undo in the toast, within six seconds. Otherwise contact Vandana.

Known limits

- Desktop and laptop only. Mobile is not yet supported.
- No self service password reset. Email Vandana.
- No photo or document attachments yet. Use the shared drive.
- Live updates appear on reload or next save, not instantly
- Bulk task edit is limited to Gantt drag for date shifts

Support
